Maintenance, Repair and Operations - Integration

Key Figure data integration content from Plant Maintenance

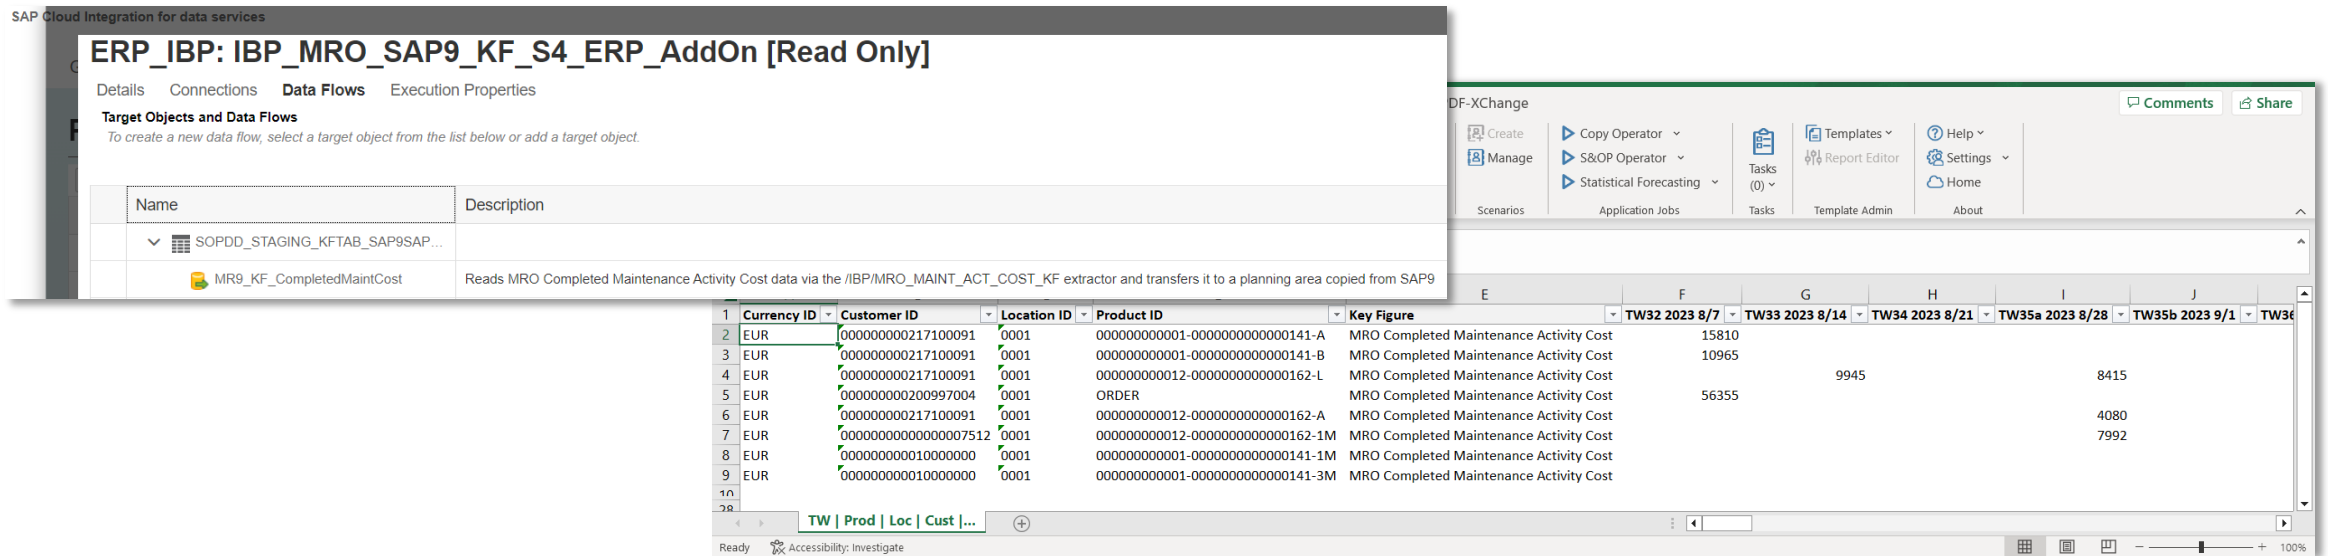

- 1 new Key Figure data extractor is planned to be delivered for Completed Maintenance Activities Costs data

The screenshot shows the 'Extractor Name (1)' configuration window. The 'Restrictions' tab is active. Below the toolbar, there is a table with the following data:

DataSource	V...	Long Description	Ext. Met...	ProviderStructure	DataSource Extractor
/IBP/MRO_MAINT_ACT_COST_KF	A	Maintenance activities costs Key Figure F1		/IBP/S_MRO_MAINT_COST_KF_PUB	/IBP/ETS_RSAX_BIW_GET_DATA

- New CI-DS flow will be added to the existing template IBP_MRO_SAP9_KF_S4_ERP_AddOn to send Completed Maintenance Activities Costs data to IBP

The screenshot shows the SAP Cloud Integration for data services interface. The 'Data Flows' tab is active, displaying a data flow configuration for 'ERP_IBP: IBP_MRO_SAP9_KF_S4_ERP_AddOn [Read Only]'. The 'Target Objects and Data Flows' section shows a table with the following data:

Name	Description
SOPDD_STAGING_KFTAB_SAP9SAP...	
MR9_KF_CompletedMaintCost	Reads MRO Completed Maintenance Activity Cost data via the /IBP/MRO_MAINT_ACT_COST_KF extractor and transfers it to a planning area copied from SAP9

Below the configuration, a data table is displayed with the following columns: Currency ID, Customer ID, Location ID, Product ID, Key Figure, and various time periods (TW32 2023 8/7, TW33 2023 8/14, TW34 2023 8/21, TW35a 2023 8/28, TW35b 2023 9/1, TW36).

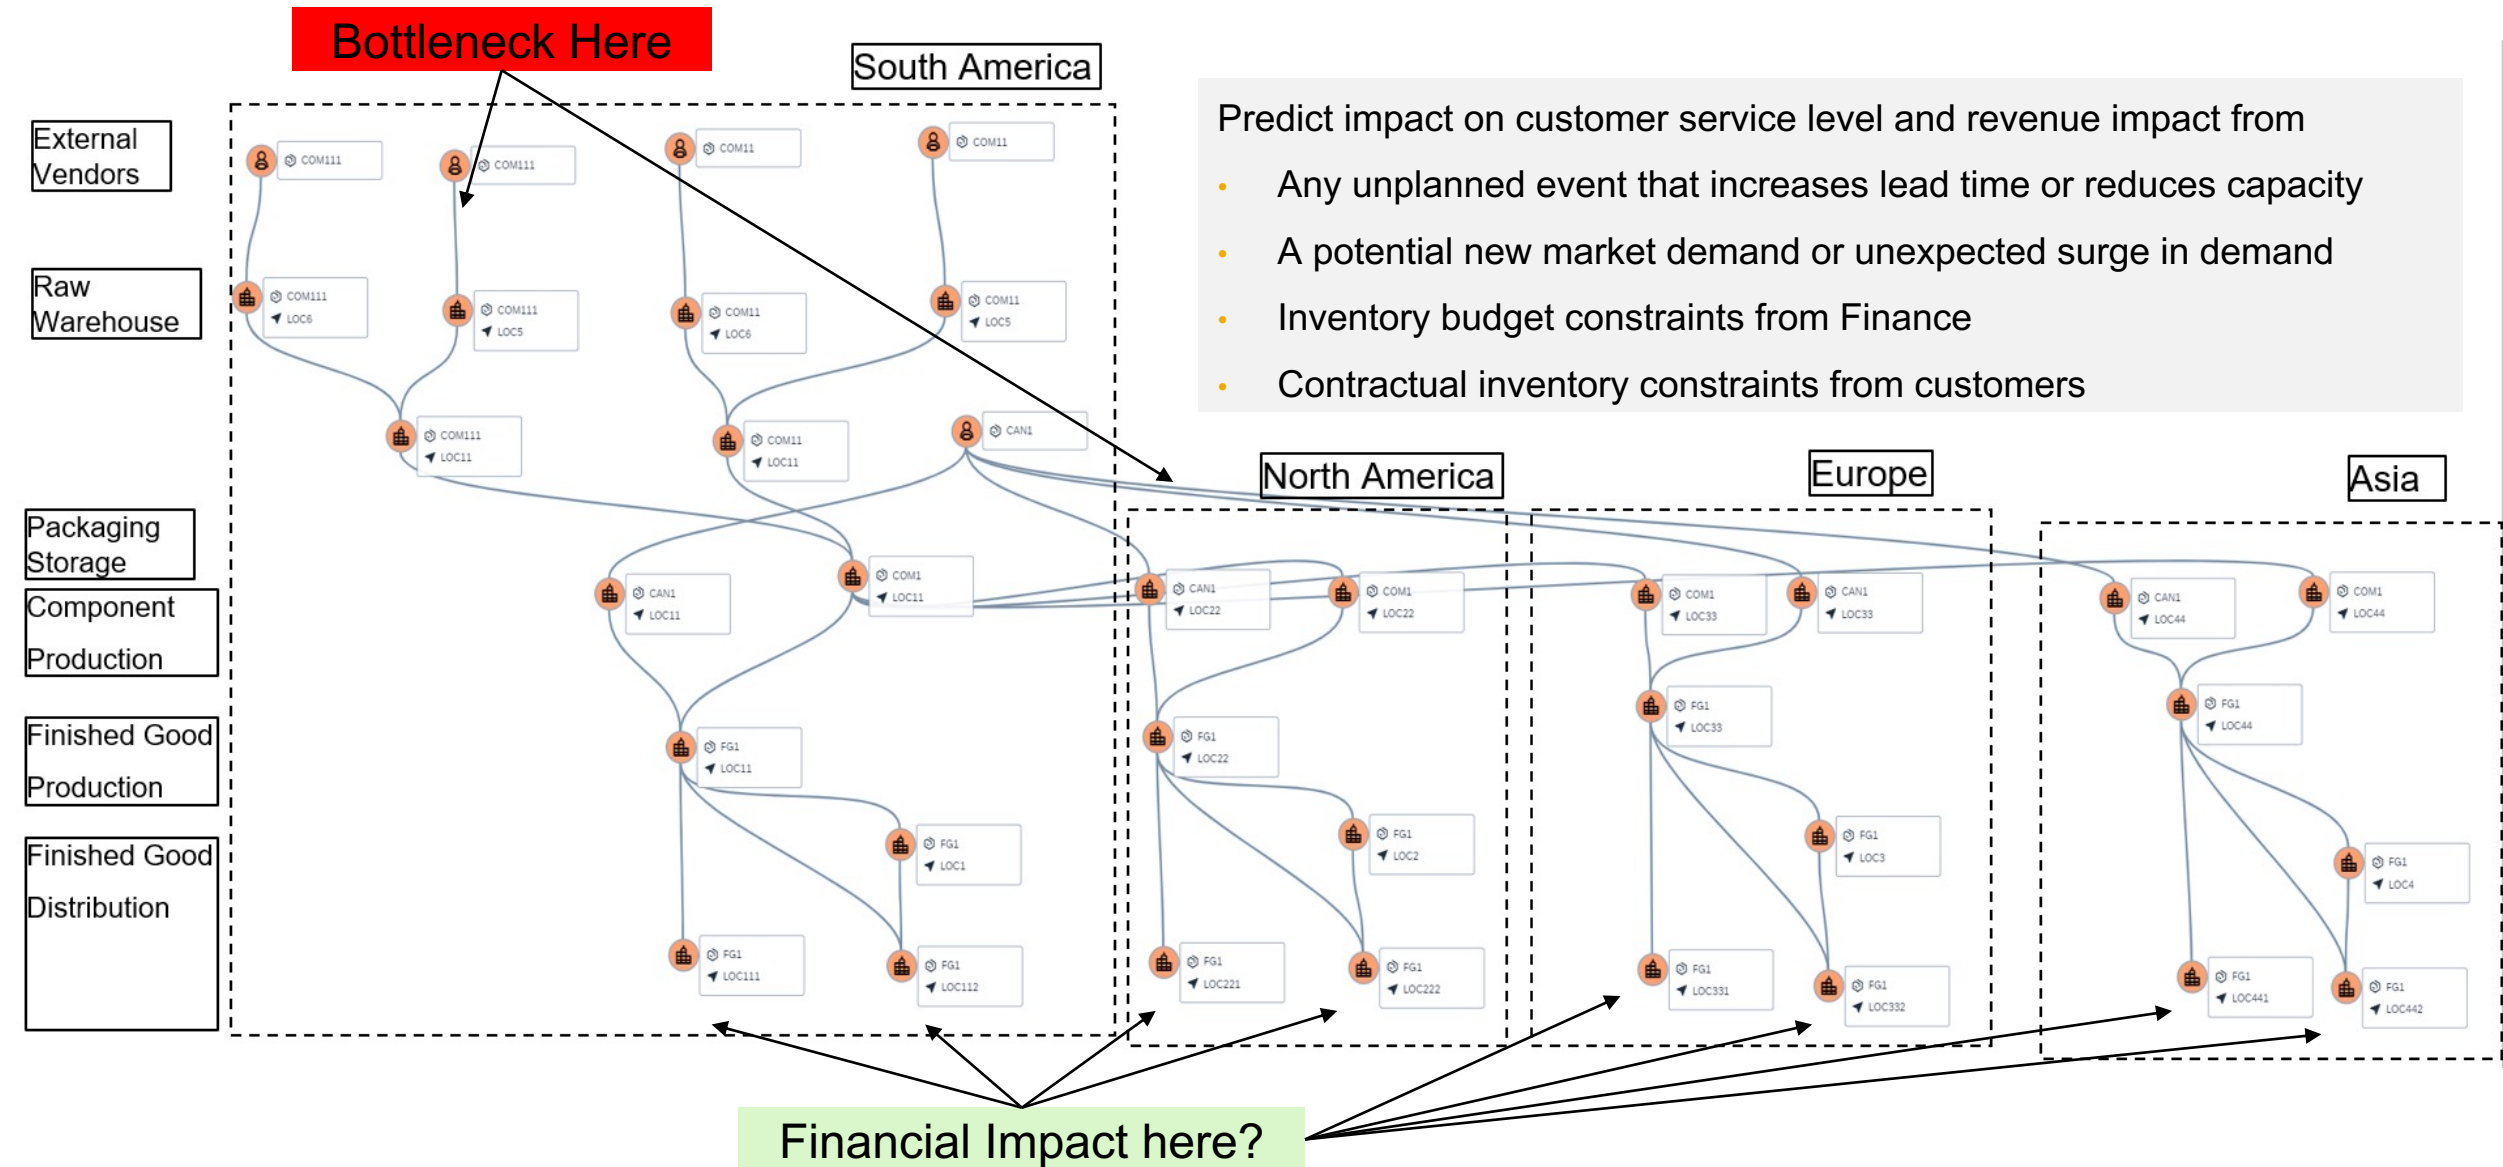

Currency ID	Customer ID	Location ID	Product ID	Key Figure	TW32 2023 8/7	TW33 2023 8/14	TW34 2023 8/21	TW35a 2023 8/28	TW35b 2023 9/1	TW36
EUR	000000000217100091	0001	000000000001-0000000000000141-A	MRO Completed Maintenance Activity Cost	15810					
EUR	000000000217100091	0001	000000000001-0000000000000141-B	MRO Completed Maintenance Activity Cost	10965					
EUR	000000000217100091	0001	0000000000012-0000000000000162-L	MRO Completed Maintenance Activity Cost		9945		8415		
EUR	000000000200997004	0001	ORDER	MRO Completed Maintenance Activity Cost	56355					
EUR	000000000217100091	0001	0000000000012-0000000000000162-A	MRO Completed Maintenance Activity Cost				4080		
EUR	0000000000000007512	0001	0000000000012-0000000000000162-1M	MRO Completed Maintenance Activity Cost				7992		
EUR	000000000010000000	0001	000000000001-0000000000000141-1M	MRO Completed Maintenance Activity Cost						
EUR	000000000010000000	0001	000000000001-0000000000000141-3M	MRO Completed Maintenance Activity Cost						

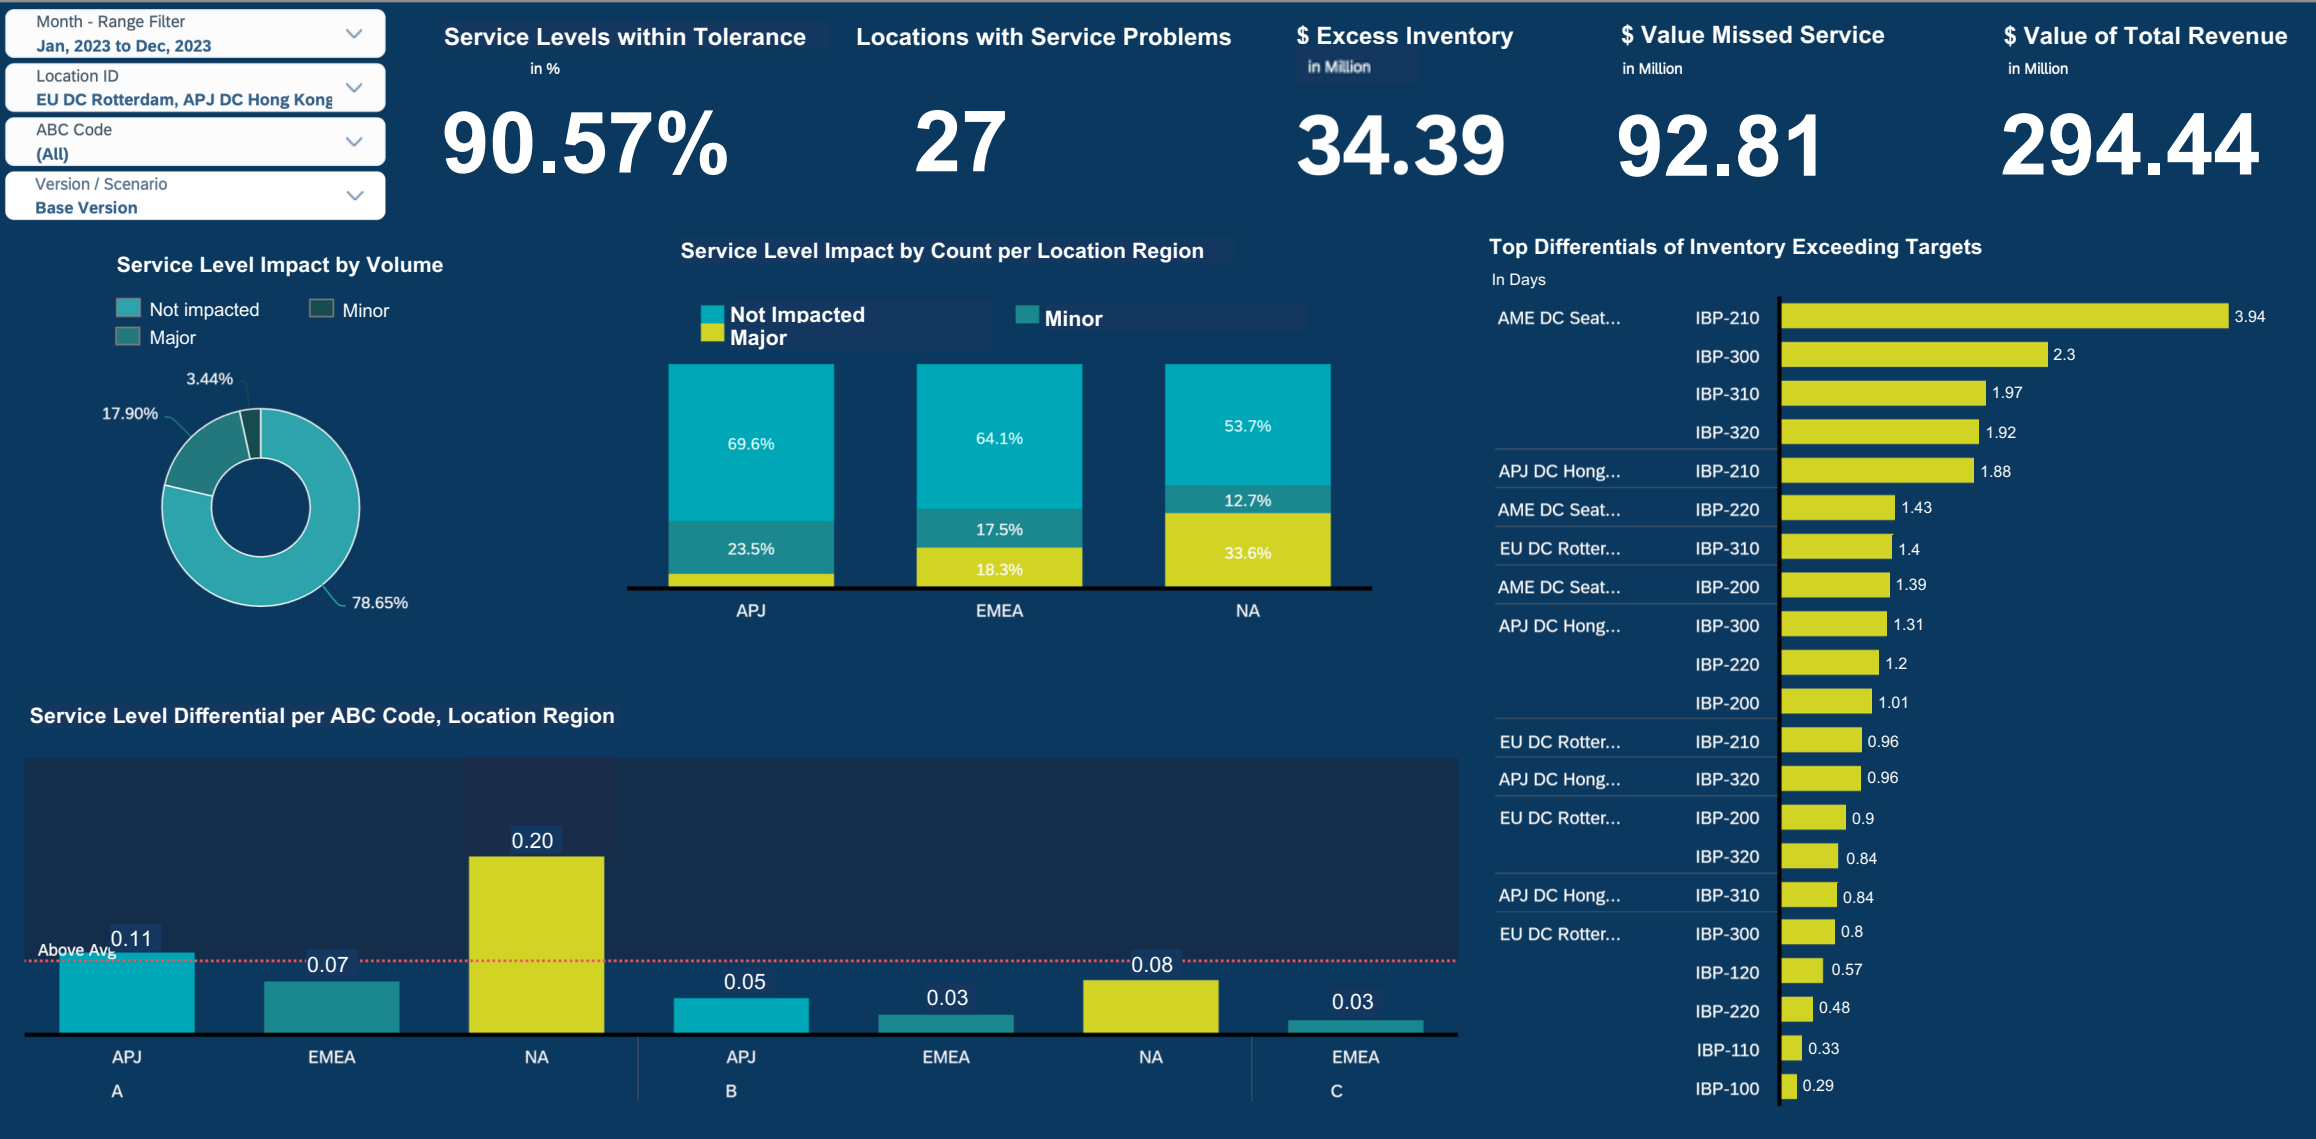

Inventory Optimization

Inventory optimization	New Service Level Prediction Operator	You can now use the Service Level Prediction operator to determine how manual adjustments to safety stock impact the service levels at location products throughout your supply chain.	Application job; Model configuration; SAP IBP, add-in for Microsoft Excel; Web UI
Inventory optimization; Unified planning area (SAPIBP1)	Change of Name and Description of the NONSTOCKALLOCATIONHORIZON Attribute	In the SAPIBP1 sample planning area, the name and description of the NONSTOCKALLOCATIONHORIZON attribute have been changed to Fair-Share Horizon .	Model configuration
Inventory optimization; Unified planning area (SAPIBP1)	Support of Service Level Prediction	To support the new Service Level Prediction operator for inventory optimization, three new key figures were added to the SAPIBP1 sample planning area.	Model configuration; Planning algorithm
Inventory optimization	Planned Deletion of Inventory Optimization Operator Job Template	As previously announced, the Inventory Optimization Operator job template has been deprecated and will be removed from the Application Jobs app in SAP IBP 2402. Existing jobs that are based on this template will fail to run. Please use the Profile Based Inventory Optimization job template for running inventory optimization operators.	Application job; Web UI

Predict the Impact of any Network Bottleneck on Customer Service Level

Service Level Prediction Dashboard Mockup

Details for Service Level Prediction

To support this feature, a input key figure is available for sample planning areas compatible with inventory optimization (that is, SAP3 and SAPIBP1). To support the unit of measure (UOM) conversion for the **Inventory Target** input key figure, the below helper key figure is also available. Lastly, an output key figure is available in planning areas compatible with inventory optimization

ID	Name	Base Planning Level	Definition
IOINVENTORYTARGET	Inventory Target	WKPRODLOC	Target quantity of safety stock at a location product that is used to override recommended safety stock and predict service level.

ID	Name	Base Planning Level	Definition
HCONVIOINVENTORYTARGET	Helper Key Figure	WKPRODLOC	Helper key figure supporting UOM for Inventory Target input key figure.

ID	Name	Base Planning Level	Definition
PREDICTEDSERVICELEVEL	Predicted Service Level	WKPRODLOC	Service level that is predicted at a location product after the quantity of recommended safety stock is adjusted using the Inventory Target input key figure.
