Synchronized Planning for
Production

Synchronized Planning for Production

Bülent Akin, Berthold von
Haaren

Key figure integration

New Flexible Constraints Heuristic available in PP/DS as of SAP S/4HANA 2023

Motivation

New production planning heuristic considering constraints during supply generation. This supports scenarios like pre-production, limited supplier capacity for subcontractors, allocation planning with AATP or bounds for Production Planning Optimizer

Flexible

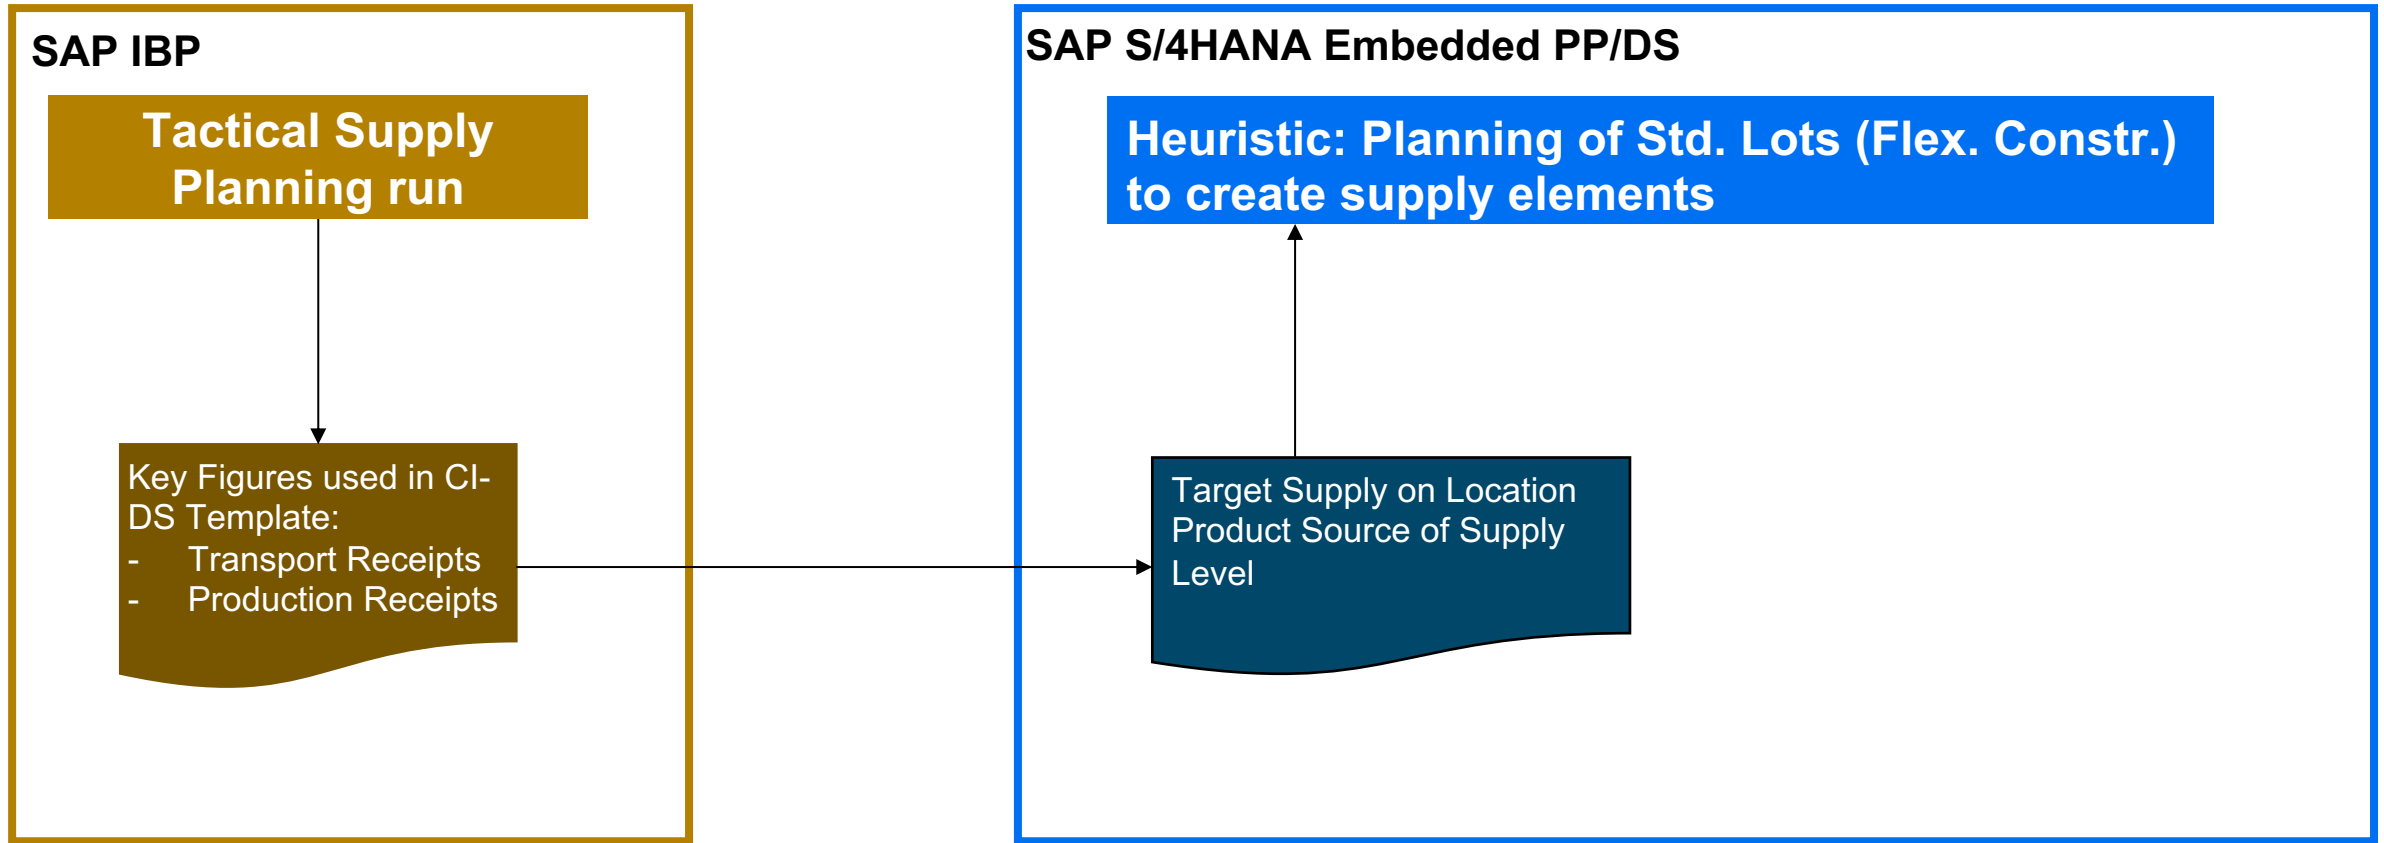

Constraints can be defined with quantity on various semantics (target, min and max*), on various levels (location – product or location – product – source of supply), for any time interval and extendible for customers

Influence

With the definition of constraints quantity, availability date and source of supply can be influenced during supply receipt generation

Data Flow between SAP IBP and S/4HANA PP/DS using flexible constraints

Flow based on standard template

Demo

Integrating Plan Monitor KPIs from S/4 HANA PP/DS to SAP IBP key figures

Usage

With SAP IBP 2311 and SAP S/4HANA 2023 five selected KPIs from the PP/DS plan monitor can be integrated as key figures to IBP (for tactical or operational supply planning) using Cloud Integration for Data Services. The key figures can be used e.g. in Analytics or shown in Planner Workspace

Delta capabilities

A delta mechanism is available for most of the KPIs to make sure that only changed data is transferred. This allows you to run the integration on a regular basis

Use PP/DS KPIs in IBP for Analytics or for Displaying

Integrate KPIs from PP/DS as key figures

Production KPIs PP/DS

	Location ID	Product ID	Versions	Key Figures	CW30 M7 2023	CW31 M8 2023	CW32 M8 2023	CW33 M8 2023	CW34 M8 2023	CW35 M8 2023
1	DC72	TS08_PHONE_A	Upside Version	Total On-Time Quantity	800	0	0	0	0	0
2	FA71	TS08_PHONE_A	Upside Version	Total Delayed Quantity	0	800	7,400	200	9,200	3,800
3				Total On-Time Quantity	0	0	7,200	0	9,000	3,600
4	FA72	TS08_PHONE_A	Upside Version	Total Delayed Quantity	0	0	0	0	0	0
5				Total On-Time Quantity	800	800	200	200	200	200
6				Total Delayed Quantity	0	0	0	0	0	0

Used e.g. in Analytic Charts

Production Receipts vs. Confirmed Production Receipts from PP/DS

Level 1 Chart Name

Confirmed Production Receipts from PP/DS comparison of Baseline and Upside

Note: These KPIs can also be integrated in a SAP7/SAP7F planning area using Cloud Integration for data services

Demo

Order integration

New planning capabilities for purchasing receipts widen the order-integration framework

Motivation

Production Planning Integration Modes allow a differentiated division of labor between OBP as a network planning system and PP/DS as a more detailed production planning system. Thus, OBP integrates the entire supply chain independent of detailed planning concepts in different parts of the horizontal supply chain.

Flexible

In inhouse production, the delegation options range between *display only*, *schedule only*, and *short-term planning* in PP/DS. The integration mode for *short-term planning in PP/DS* now allows the choice between *display only* and *short-term planning* for stock transfer requisitions and purchase requisitions.

Further Outlook

We plan two-stage planning capabilities for purchasing receipts, so OBP planned requisitions can be distinguished from PP/DS planned requisitions. New modes of integration are part of product direction.

Order integration is now enabled for planning of purchasing receipts in short-term PP/DS

Planned Purchasing Receipts (To Date)

- Stock transfers and purchase requisitions only planned in OBP
- No delegation to PP/DS, displayed only as eXternal orders in PP/DS.
- Source of supply is at the source location level: Mode of Transport in OBP does not match with Means of Transport in PP/DS
- Handling and Transport resources not assigned to receipts

★ New option for PPIM 3 (with IBP 2311)

- Stock transfers and purchase requisitions also planned in PPDS
- Horizon based concurrent planning of purchasing receipts:
 - No distinction of planning stage OBP vs. PP/DS, same order type for planned purchasing receipts planned in OBP and planned in PP/DS
 - No handover step from OBP to PP/DS as opposed to planned orders
- Consistent detailed level source of supply:
Mode of Transport in OBP matches with Means of Transport in PP/DS from planning to execution
- Handling and Transport Resources can be assigned to receipts

In PP/DS, we can generate subcontracting purchasing plans as part of short-term PP runs and integrate them to OBP real-time.*

Configuration and Prerequisites for short-term planning of purchasing receipts in PP/DS (Overview)

In order to plan purchasing receipts in OBP and PP/DS concurrently with PPIM 3 location products the following configuration settings and prerequisites have to be considered:

- 1 **IBP OBP and S/4H PPDS:** Maintain additional location product master data for Production Planning Integration
Maintain PPIM and DPS Horizon for location product and distribute master data to OBP
- 2 **S/4H PP/DS: Advanced Planning Flag (PP/DS):** Leave scope restriction value in S/4H material master blank
- 3 **IBP OBP: Planning Run Profiles:** Activate DPS Horizon switch not only for Production but also for Distribution
- 4 **S/4H PP/DS: SAP Notes for sample BAdI enhancements** to protect OBP plans in PP/DS
 - Protect OBP Plan outside PP/DS Horizon (Mandatory)
 - Adhere to the overall OBP planned quantities even within PP/DS Horizon (Optional)
 - See SAP note: [3291712](#) - Preserve the Overall Order-Based Planning Outcome with Production Planning Integration Mode 3
- 5 **IBP OBP and S/4H PPDS: Keep master data in sync** between OBP, PP/DS, and ERP
 - **Modes of Transport** (OBP) and Means of Transport (PP/DS)
 - **Calendars**
 - **Durations in scheduling** (GI Processing Time, Transport or Lead Times, and GR Processing Time)

Overview of Production Planning Integration Modes for Order-Integration

OBP Integration Mode (PPIM)	Code Value	PP/DS Scope Limitation	Code Value	Inhouse Planned Orders	Planned Purchasing Receipts
Available					
Displayed in Detailed Planning and Scheduling (IBP 2021)	9	Display only	1	- Single order stage: OBP planned orders only - Planned in OBP - Displayed in PP/DS	- Single order stage: OBP requisitions only - Planned in OBP - Displayed in PP/DS
Detailed Scheduling delegated (IBP 2021)	1	Restricted / Inhouse only	2	- Two stages of planned orders: OBP vs. PPDS - Planned in OBP - Scheduled in PP/DS in detail	
Short-term Production Planning and Detailed Scheduling delegated	3	Entire Scope / Inhouse Only (IBP 2205)	4	- Two stages of planned orders: OBP vs. PPDS - Planned in OBP - Planned <i>and</i> Scheduled in PP/DS in detail	
		Unrestricted (IBP 2311*) 	Blank		- Single order stage: Requisitions may be created or changed in OBP <i>or</i> PP/DS - Planned in OBP (mid-to-long term) - Planned in PP/DS (short-long term) New
Product Direction					
Detailed Planning and Scheduling delegated	2	Unrestricted	Blank	- Single order stage: PP/DS planned orders only - Displayed in OBP - Planned in PP/DS	- Single order stage: PP/DS requisitions only - Displayed in OBP - Planned in PP/DS
Short-term Planning and Detailed Scheduling delegated	4	Unrestricted	Blank	- Two stages of planned orders: OBP vs. PPDS - Planned in OBP - Planned <i>and</i> Scheduled in PP/DS in detail	- Two stages of requisitions: OBP vs. PPDS - Planned in OBP (mid-to-long term) - Planned in PP/DS (short-long term)

*Only available for Flexible Planning areas and Real-Time Integration

This is the current state of planning and may be changed by SAP at any time
