

UNAI

one AI · the work of many

Pronunciation

“oo-NYE” (two syllables). Always written as ONE word: UNAI — never “Un AI” with a space.

What it means — four readings, one idea

- Basque “shepherd” — one who guides the many.
- “one + AI” — the letters themselves.
- “Un AI” = “One AI” — in French/Spanish, un = one.
- A nod to unity — many specialist agents become one adaptive agent.

Category descriptor (use alongside the name)

UNAI — a consolidation super agent.

Colour palette

Navy	Teal	Blue	Ink	Light

The mark

Many small nodes converging into one ring = the shepherd gathering the many into one.

Use the wordmark lockup on light or dark backgrounds (unai_logo_light/dark). Keep clear space $\geq$ the ring's height.

Do / Don't

DO: write UNAI as one word · pronounce oo-NYE · lead with the tagline “one AI that does the work of many.”

DON'T: split as “Un AI” in body copy · read it as the prefix “un-” (not/anti) · use it for the orchestrator pattern.

Naming origin (for the record)

Chosen after broad cross-language search; no AI company found using the name (a Basque first name, e.g. Unai Emery, but clean as a tech brand). Formal trademark/domain clearance recommended before external launch.
